

FOSSIL PUZZLER (1 HOUR)

Addresses NGSS

Level of Difficulty: 2

Grade Range: 3-5

OVERVIEW

Students will examine and sketch various trace fossils from an unknown creature and then construct an image of the creature that they believe produced these fossils.

Topic: Fossils

Real World Science Topics:

- An exploration of how trace fossils are used by scientists
 - An exploration of how scientists draw inferences from pieces of data
-

Objective

Students will gain an understanding of how scientists use trace fossils to construct a model of an unknown creature and infer information about the creature.

Materials Needed for Each Team of 2-4 Students:

modeling clay
one oddly shaped doll (such as a fictional animal or alien)

Materials Needed for Student Activity (each group of two to four students):

set of three clay fossil imprints
pencils or pens
large paper
